Disinfection Wipes Application

DWA 80 Plus

FAST ACTING, ALCOHOLIC HAND AND SURFACE DISINFECTANT PRODUCTS

- FAST ACTING
- CONTAINS OVER 80% ALCOHOL
- CLEANS AND DISINFECTS IN ONE PHASE
- UNIVERSALLY APPLICABLE, SUITABLE FOR HANDS AS WELL AS SURFACES
- APPLICABLE IN THE FOOD INDUSTRY
- ALDEHYDE-FREE

PRODUCT DESCRIPTION

DWA 80 Plus is a wide antimicrobial spectrum hand and skin disinfectant bactericide, fungicide, virucide, with excellent cleaning and disinfecting effect (Hepatitis B deactivating as well).

RECOMMENDED AREAS OF APPLICATION

- For the wiping and disinfection of the skin and small dry, alcohol resistance surfaces;
- Applicable in the healthcare sector;
- In public institutions, schools, in catering, sports centers, etc.
- In the food industry (canneries, processing facilities, confectionary factories units)

SPECIAL FEATURES

The wet disinfectant wiping cloth contains the amount of impregnating disinfectant substance, which spreads evenly on the surface for disinfection, when it is applied to the surface and properly pressed, thus the biocide liquid directly contacts the microbial contaminants. The concentration of the disinfectant liquid's biocide ingredients are adjusted so it not only achieves the prescribed microbe-count reduction for the targeted contact times, but it is also not harmful to the skin surface chemically or physically. The microbial effect range and contact times are certified by numerous accredited laboratory test results.

EFFECT RANGE

TYPE	STANDARD	CONTACT TIME
Bacteria (bactericid)		
Enterococcus hirae	EN 1276:2010	30 sec
Escherichia coli (E. coli)		
Pseudomonas aeruginosa		
Staphylococcus aureus		
Methicillin Resistant Staphyloccus aureus (MRSA)		1 min
Escherichia coli (E. coli)	EN 1500:2013	30 sec
Fungus (fungicid, yeasticid)		
Candida albicans	EN 1650:2008	30 sec
Aspergillus brasiliensis		
Virus (virucid)		
Adenovirus Type 5	EN 14476:2005	30 sec
Poliovirus Type 1		
Mycrobacteria (tuberkulocid)		
Mycobacterium tuberculosis	EN 14348:2005	1 min

MATERIAL COMPATIBILITY

	SURFACE MATERIAL	COMPATIBILITY
METAL	Aluminum alloy 6061	Compatible
	Copper alloy 260	
	Chromium plated metal	
	Brass alloy 110	
	Nickel	
	Nickel plated metal	
	Stainless steel 304	
	Stainless steel 316	
	Steel SAE 1008/1010	
	Titanium	
	Zinc	
POLYMERS	Acryl	Compatible
	Acrylonitrile Butadiene Styron (ABS) Cycloid M MG47	Közepes (vizuális) degradáció
	Polybutylene terephthalate (PBT) Valox M 215 HPR	Compatible
	Polycarbonate	Közepes (vizuális) degradáció
	Polyester	Compatible
	Polyethylene	
	Polypropylene	
	Polystyrene	Közepes (vizuális) degradáció
	PVC	Compatible
RUBBER	Santoprene	Compatible
	Silicone rubber	
CERAMICS	Glazed ceramic tile	Compatible
GLASS	Conventional glass	

INGREDIENTS

Biocide active ingredients:
Ethanol: 83.5%, biphenyl-2: 0.15%
Other ingredients: benzyl-alcohol, lactic acid, water

TYPE

PT1, PT2, PT4 category biocide product. Recommended for professional as well as household use

HAZARDS

Skin treated with other cleaning agents, in the case of wiping still wet surface, the strength of the antimicrobial effect may change, thus to achieve the maximum disinfectant effect, it is recommended to use the product on dry surfaces. Only use on electronic devices after complete drying!

Always take care of safety when applying biocides! Always read the user manual and the label before use!
