## PRODUCT DESCRIPTION

DWA Detergent is a wide antimicrobial spectrum hand and skin disinfectant bactericide, fungicide, virucide, with excellent cleaning and disinfecting effect (Hepatitis B deactivating as well). It is a product intended for the one-phase disinfection of noninvasive medical devices. The product is fragrance free, it is generally applicable on all alcohol resistant medical device surfaces that do not come into contact with mucus membranes.

## RECOMMENDED AREAS OF APPLICATION

The products is one-phase cleaning and disinfectant wipe cloth applicable for the disinfection of washable walls, work surfaces, the surfaces of furniture and equipment as well as sanitary units in public institutions, schools, gyms, sports centers, factory kitchens, locker rooms as well as in households. It is suitable for the disinfection of work benches and work desks.

## SPECIAL FEATURES

The concentration of the disinfectant liquid's biocide ingredients are adjusted so it not only achieves the prescribed microbe-count reduction for the targeted contact times, but it is also not harmful to the skin surface chemically or physically. The microbial effect range and contact times are certified by numerous accredited laboratory test results.

The wet disinfectant wiping cloth contains the amount of impregnating disinfectant substance, which spreads evenly on the surface for disinfection, when it is applied to the surface and properly pressed, thus the biocide liquid directly contacts the microbial contaminants.
