- ✓ FAST ACTING
- ✓ CLEANS AND DISINFECTS IN ONE PHASE
- ✓ DRIES FAST
- ✓ CONTAINS 70% ALCOHOL
- ✓ DOESN'T DRY THE SKIN
- ✓ ALDEHYDE FREE

PRODUCT DESCRIPTION

DWA Safety Plus is a wide antimicrobial spectrum hand and skin disinfectant bactericide, fungicide, virucide, with excellent cleaning and disinfecting effect (Hepatitis B deactivating as well).

RECOMMENDED AREAS OF APPLICATION

Ideally applicable for:

- Hand disinfection in home settings: before meals, before-after using the toilet, during housework.
- Hand disinfection in schools, institutions, restaurants between social contacts.

SPECIAL FEATURES

The concentration of the disinfectant liquid's biocide ingredients are adjusted so it not only achieves the prescribed microbe-count reduction for the targeted contact times, but it is also not harmful to the skin surface chemically or physically. The microbial effect range and contact times are certified by numerous accredited laboratory test results. Its glycerin content counterbalances the skin-drying effect of alcohol. Fragrance and coloring free.

EFFECT RANGE

TYPE	STANDARD	CONTACT TIME

INGREDIENTS

Biocide ingredient:

1 g/kg Didecyltrimethylammonium-chloride,
1 g/kg quaternary ammonium compounds,
benzoyl (C12-C16) alkyldimethyl chloride,
propane-2 (700 g/kg);

Other ingredients: glycerin.

TYPE

PT1 category biocide product

HAZARDS

Highly flammable liquid and steam. Severe eye irritant. Harmful to aquatic environment, causes permanent damage. To achieve the maximum disinfectant effect, it is recommended to use the product on dry surfaces. Only use on electronic devices after complete drying! Avoid contact with open wounds. Do not use the product after its expiration date! Recommended for professional as well as household use.

For safe use, always read the product information on the label before use.
